**EXTRA CREDIT (20 points): Dig a Trench:** Just before the Battle of the Trench, several hundred Sahabah dug a ditch across the northern part of Medina to protect it. In just 1 week, they moved thousands of pounds of earth to create the trench that was over 1 mile long, about 8-10 feet deep and 12 feet across.

To get a little idea of how this could have felt, dig a small ‘*trench*’ in your backyard with the dimensions: **3 ft long x 1 ft wide x 1 ft deep**. In order to receive the extra credit, either bring

in a picture of your 'trench', or have you parents write and sign a note that you did it. ***Be sure to get permission from your parents first!***
