

Read at night Surat al Nass protects the
Muslim from inside evil though

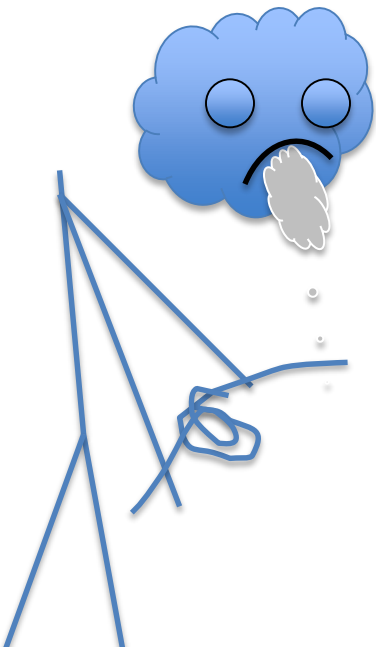

while Surat al Falaq gives us protection from
outside harm and evil.

Jealous people

People who do evil magic by blowing onto tied knots, their intention is to hurt.

Surat al Falaq gives us protection from everything outside of our body that might harm us that Allah has created. Surat Al falaq also gives us protection from specific people that are jealous and who do evil magic, these are bad people that want to do evil and harm us.

It is important to read surah al Falaq with surat al Nass at night, because Surat al Nass gives us protection from any harm inside of us, such as harmful and evil thoughts, while surah al Falaq gives us protection from outside of ourselves.
